➡ ***Wholesale Partners Tracking Availability - July-December 1996 Program***

Partners Tracking Functions and Reports for the July - December 1996 Program period will be available on Monday, September 2, 1996.

All Tracking Functions will remain the same with the following exceptions:

- The automatic default will be the program period 7/1/96 - 12/29/96. You must press the **PF9** Key to view previous program periods.

- **T06 Function**: The status will include all data submitted by accounts for the first six (6) weeks of the program (7/1/96 through week ending 8/11/96).

On Monday September 9, 1996, the status will include all data submitted by accounts for the first eight (8) weeks of the program (7/1/96 through week ending 8/25).

On each subsequent Monday thereafter, one (1) additional reporting week will be included.

Notes:
- We are only receiving one data feed from MSA per week. Therefore, once you review the status of an account beginning on a Monday the status will not change until the next Monday.

- Should you have any questions why some weeks are not included for any account, please contact the Partners Help Desk at **#1-800-230-9372** between the hours of 9 a.m. - 5 p.m. EST.

- **T20 Function:** Has been eliminated.

- **T29 Function:** Provides a view of SOM/AIM availability. This option is used to view the most current time periods for which SOM and AIM data are available. This function has been reprogrammed to include Weekly Detail previously contained in T20. There will no longer be a need to resolve on-line "Y" exceptions. Exceptions are now resolved through MSA communications (see Attachment C for instructions).

ROU DETAIL

➡ ***WINSTON Ground and Pole Mount Conversion Kits***

In an effort to provide Field Sales with new WINSTON graphics for existing WINSTON SELECT ground and pole mounts, we have developed the WINSTON Ground Mount Crash Pack Conversion Kit (#507482 contains 2 crash packs per kit) and the WINSTON Pole Mount Conversion Kit (#507491 contains 1 crash pack per kit) for converting these two WINSTON SELECT PDI items. These kits are currently available for order through SMS.
